Cineworld New Mersey Retail Park

The Cineworld New Mersey Retail Park in Speke extends sci-fi to their new exterior cladding system designed and installed by WPL UK. Adventurous complex shapes and perforations all fire the senses. This could be the first 5D experience and that is before the film starts. Our bold, 'no task too difficult' approach contours to generate fresh and ideas and break all boundaries.

High impact facade comprising of a series of structures using perforated rainscreen panels in Stainless Steel.
