Kings Walk, Gloucester

The 1970s and 80s were a great era for the big shopping centres but after 30 years of hard labour, a lick of paint just won't do it. At the Kings Walk Shopping Centre in Gloucester the property owners invested in a WPL state of the art pattern perforated aluminium anodic finished rainscreen façade. This completed phase one and the WPL Team continue to add more products in phase two to architecturally enhance and adorn a shopping centre fit for a king.

Bespoke perforated aluminium anodic finished rainscreen panels and decorative mesh
