Louvre Blade Triple Z

A small profile manufactured as a continuous or panel form for rain defence with good ventilation. The structure of the blade minimises air pressure losses which drive essential ventilation, yet still protect the area from unwanted water entry.

A conundrum for any designer is how to bring in much required ventilation to areas which need to be rainproof like electrical control rooms and this Triple blade is one solution.

**Material:** Aluminium  
**Free area (%):** 50  
**Blade Pitch (mm):** 50  
**Blade Angle (degrees):** 45  
**Max Span:** 1200  
**Extras:** Mullions; flashings;  
**Profile:** Z Blade  
**Size:** Small  
**Height (mm):** 62.4  
**Depth (mm):** 41.9
